Selling 60 Simmental & SimAngus Bulls

20 Simmental & SimInfluenced Pairs & Bred Females

**THE CLEAR
CHOICE**
bull sale

QUICK REFERENCE TO ASA EPDS AND \$ INDEXES

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-pounds more weaning weight than B. If calving ease were the trait, A would be expected to sire 15-percent more unassisted births in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org. Listed below are the units ASA EPDs are expressed in:

Calving Ease (CE): Percent of unassisted births when used on heifers.

Birth Weight (BW): Pounds of birth weight

Weaning Weight (WW): Pounds of weaning weight.

Yearling Weight (YW): Pounds of yearling weight.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.

Milk (Milk): Pounds of weaning weight due to milk.

Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.

Marbling (Marb): Marbling score.

Ribeye Area (REA): Square inches of ribeye.

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)

Additional EPDs not shown in catalog:

Stayability (STAY): Percent of daughters remaining in the cowherd at 6 years of age

Back Fat (BF): Inches of backfat.

Carcass Weight (CW): Pounds of carcass weight.

Yield Grade (YG): Yield grade score.

Warner-Bratzler Shear Force (WBSF): Pounds of force required to shear a steak.

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)

\$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes: All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

Using API and TI: First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years ($\$50 \text{ diff.} \times 30 \text{ hd.} \times 4 \text{ yr.} = \$6,000$). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org.

As we prepare for the 2022 Clear Choice Bull Sale, we can not help but look back on how far we have come. Though sale times can be stressful, it is always good to take a moment and look what God has given us; especially considering all that has and is going on in our world.

One thing we can always keep constant is working hard daily selecting genetics, breeding, caring for, and raising high quality Simmental genetics. We are grateful we have the opportunity to do that, and have friends who share the same ideals to come together to put on a sale.

We think one of the things that stands out this year is the awesome job both ours and Beshears' donor cows have been hitting the mark. These bulls are marked some exceptional females and pedigrees. We are really proud of that, and is truly why we are able to have both bull and female sales.

As always we invite you to come and view the bulls here at the farm sale week, or reach out to any of the consignors, Doug or Drew about the offering. We thank you for your support and interest in this sale and our program now and over the years.

Jeff & Leah Meinders
ClearWater Simmentals

On behalf of DP Sales Management, we would like to welcome to the Clear Choice bull sale at Clearwater Farms in Milan, Indiana. Jeff and Leah always provide several opportunities whether you are a past customer or a potential buyer or even a seller that needs assistance in marketing their product. The Clear Choice has three sales a year, the Bull sale, the Customer sale and the Female sale. All of the Clear Choice breeders are here to help you achieve your goals through your purchase of your next herd sire. Whether you are looking to add pounds and growth or adding that herd sire for calving ease with balanced traits or add to your lineup to help not only your cow herd and others as well marketing semen. Look around, ask around, no matter what your goals or selection process the Clear Choice wants to assist in your needs.

The bull selection in the Clear Choice is strong backed by generations of proven genetics with the proper management, health protocol, nutrition, and common sense. The group had bred bulls that will add a ton of genetic merit to your herd. One thing you as a buyer, the Clear Choice encourages you stop any of our locations of Clearwater, Beshears, Neal Bros and Hoeing anytime beforehand or even the week of the sale. The week of the sale stop in or see you sale day. We at DP Sales along the rest want to fulfill your needs on a herd sire however you select the one that fits the needs of your cow herd. The sale in will be on DVAuctions. The prospects will work anywhere across the country. We will have trucking so don't worry about the process. We will be glad to assist in your selection, come with some parameters and the end point.

There has been no female in recent years that has been as dominant in making bulls than WS Miss Sugar C4. Last year we sold a Sugar C4 son for \$24,000 to Schooley Cattle Co. This Vantage Point son is set to continue on the family tradition of exceptional Sugar progeny. If you look at his genotype alone, he excels by being in the top 5 percent 8 EPD categories, and half of those are top 1-2%. One of the other characteristics that makes him unique is being hetero black, homo polled allowing you to produce some of those sought after red genetics. H4E is an exceptional future herd sire that we are very proud to raise here at ClearWater. He is truly a total package herd sire.

Many breeders assure clients of second to none customer service on sale day, but Clear Water Simmentals delivers amazing customer service every day. We are currently calving our third set of calves sired by our Clear Water bull and the quality has been unrivaled even against AI contemporaries. Looking back on the past three years, I am certain the best decision for my program was to invest in yours.

- Chad Higgons, Higgons' Simmentals

WHF Andie 365A - Dam of Lots 2A-2F

Lot 2A

Lots 2A - 2F: WHF Andie continues to be a standout donor in the Clear Choice Sales producing bulls and females. In last fall's Female Sale the Andie daughters averaged \$12,500. At this year's bull sale you have the opportunity to choose from 3 different sire groups depending on the needs of your operation. There are both percentage and purebred matings. Andie progeny continue to have the style, shape, and soundness that operations look for. These 6 sons of Andie are destined to make great impacts on their new operations.

We have been extremely happy with the calves out of one of our youngest donors SS Emberly. The Warsaw x Emberly bull H303C has been a favorite of visitors from the very beginning. H303C is halter broke and shown at the NAILE. Both bulls will add muscle, shape, and soundness to your cowherd. We guarantee that you will continue to hear more about Emberly as she matures and more progeny hit the ground, so don't miss the opportunity to add a son to your operation.

Order Up is individual with that extra length of body. One of the strong attributes is testicular development with is highly important. This fall EO son is in the top 1% on WW posting 103 and the top 2% for YW at 158. The other epds are tops as well. This herd sire can go anywhere and be a benefit.

The 20-20 progeny have become highly sought after the past few years as the semen is very limited and hard to find. Buy a son with the genetics of Loaded Up and Serena as an added bonus. J74B is homo polled and homo black; sharp made and smooth shouldered. There is no questioning the future of this herd sire for your operation.

Join us on Friday!

HOW TO GET THE MOST OUT OF YOUR BULL INVESTMENT

Friday, March 25, 2022 • 6:00 PM EST

Clearwater Sale Facility

5512 E Street Road 350, Milan, IN 47031

Join us for dinner, view the sale offering and hear from Dr. Patrick Gunn, Purina Animal Nutrition Beef Cattle Consultant. Topics of discussion include tips and tricks for the breeding season and bettering your herd through nutrition.

Please RSVP by March 17th for a meal count to Purina sales representative, Megan Myerscough, 217-722-0787 or mmyerscough@landolakes.com

You don't find many baldies out of the Warsaw bull. This fall is ready to breed and get his job done and last for many breeding seasons. H074L is super fancy, clean made up through his neck and front end. If you need to pretty up some calves, put on a baldie face then look at this Warsaw son. On the dam side is the North American., Dew North and Serena. Here offers calving ease and low birth.

This February yearling's dam a Cowboy Cut female is awesome. If she passes on some her traits you will be even more impressed. You are going too proud for future offspring. J Top genetics pay off. J5105M is homo polled.

TJSC Hammer Time 35D - Sire of Lot 10

I am more than pleased with the calves from my Clear Water bulls. They've got 60-80lbs on all my Angus calves, and outweigh everything at weaning time. A couple buyers that fed out calves are telling us they are cutting choice and prime in the packers. They've really liked the way they handle feed.

- Evan Crecelius

Lot 11A

Here are 4 Purebred sons of LLSF Vantage Point and HPF Missy C068 each a month apart in age. Of course their lineage goes back to the WLE Missy U409 who continues to produce great offspring for Bird Cattle Co in Texas, and going back to the legendary 770P. C068 is really just getting started on what she is able to produce. This mating produced bulls with eye appeal! Striking from the side these bulls are clean fronted, level, square, and impressive! Look at their foot size. You make the decision on what age bull you are looking for, but any of the 4 will be great assets to your herd.

In last year's breeding we selected the Sim Angus bull, Firesteel to inject on our cows. We have been pleased with the results. This son is out of one of our top donors we purchased from Brandon Luebbue. The 20-20 X Red Jewel donor is an added plus. J380 is a baldie with a profile to catch your attention for sure. This spring born is well designed with balance and style. J380 offers strong epds in REA, MB and API. J380 is homo polled.

Maverick assists our work force from time to time. Maverick has a good eye and strong opinion. This is one of his top choices. J364 is a no holes bull being correct, deep flanked, bold sprung with more than adequate muscling. This bull is easy to like especially with his completeness. Maverick has the edge because of his dam out of Blackbird. The Blackbird family has many high sellers in both sales. His API is in the top 15% and has top ends in all traits. His weaning weight was 725. J364 is homo polled and homo black. In 2020 female sale this family produced at the high seller at \$13,000.

Can't make the sale? Bid from home with DVAuction's "real-time" internet bidding service at www.dvauction.com.

1. Create an account at www.dvauction.com under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24-hours prior to the auction. A DVAuction representative will notify you once you have been approved.
3. Tune in for the sale and make your purchases!

After the sale, contact the sale manager or owner to arrange transportation and payment. High speed internet is required for successful bidding. Be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding. If you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having Troubles? During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also be reached at 402-474-5557.

We were very fortunate to have the E/T Alexis female from Georgia make an impact in our herd over the past several years, and will continue through frozen genetics on hand. This bull was one of her last natural calves at our place before being offered in the 2021 Clear Choice Female Sale going to great customers the Sporleader family. This 3/4 blood son of Endangerment boasts a Back Fat EPD in the top 10% of the breed and top 25% in Yield Grade making him an excellent choice for those commercial producers looking for high quality grades. Coupled with his WW and YW numbers you will be able to produce calves in pounds.

Here is another son of WBF Iron Clad that originated from Wildberry Farms in Illinois. Adding Iron Clad to our operation, we knew we would be putting in a big dose of exceptional EPD's into our bulls and females that we would be marketing at the Clear Choice sales, and we have been disappointed in the results. H1 is a 3/4 blood that will be able to add hybrid vigor to your calves.

We are committed to bringing the best quality we can produce at Beshears Simmentals to the Clear Choice and J15 is nearly as good as you can get. Beginning with his pedigree a son of CDI Innovator who might be one of the best bull making sires out there, and then dropping down to his bottomsides to see the red royal beauty WHF Sierra 245S and her daughter Cierra. Both of these females have been producing high quality and high selling offspring at WHF. Then you move to J15's phenotype with his body, muscle, mass; carrying all that with soundness and ease. If you are looking to make a big impact on your herd, study J15 on sale day.

This mating of Deplorabull and Cream Soda has definitely been a money maker for us. The collection of genetics throughout this pedigree is one for the records, and that I couldn't be more pleased with. J334 is level topped, square hipped and stands on a big foot. You can't help but notice his depth of body and rib cage. We think a lot of this bull and his future impact on someone's herd.

Here is a cow in the prime of her life, well that is unless you look at here dam, A full sib to the Legendary Ebony's Joy L123, N-05 is still in our herd and still producing. How about that for longevity. So, to say DN05 is in her prime could be premature if she follows in her mother's footsteps. Regardless of how we word it here is an extremely nice cow, royally bred, that will provide her new owner with many profitable years.
