SATURDAY, MARCH 25, 2023 • 1:00 PM EST • MILAN, IN

*Selling 55 Simmental & SimAngus Bulls
5 Simmental & SimInfluenced Pairs & Bred Females*

QUICK REFERENCE TO ASA EPDS AND \$ INDEXES

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-pounds more weaning weight than B. If calving ease were the trait, A would be expected to sire 15-percent more unassisted births in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org. Listed below are the units ASA EPDs are expressed in:

Calving Ease (CE): Percent of unassisted births when used on heifers.

Birth Weight (BW): Pounds of birth weight

Weaning Weight (WW): Pounds of weaning weight.

Yearling Weight (YW): Pounds of yearling weight.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.

Milk (Milk): Pounds of weaning weight due to milk.

Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.

Marbling (Marb): Marbling score.

Ribeye Area (REA): Square inches of ribeye.

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)

Additional EPDs not shown in catalog:

Stayability (STAY): Percent of daughters remaining in the cowherd at 6 years of age

Back Fat (BF): Inches of backfat.

Carcass Weight (CW): Pounds of carcass weight.

Yield Grade (YG): Yield grade score.

Warner-Bratzler Shear Force (WBSF): Pounds of force required to shear a steak.

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)

\$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes: All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

Using API and TI: First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org.

THE CLEAR CHOICE *bull sale*

ClearWater Simmentals

Jeff & Leah Meinders
Milan, Indiana
Leah Meinders, 812-498-2840
www.clearwatersimmentals.com

Welcome!

On behalf of Jeff and I, we want to welcome our friends, customers, and potential buyers to the 2023 Clear Choice Bull Sale. This industry and the people involved are very important to us, and trusting CLRWTR genetics in your herd is something that we do not take lightly.

With that being said, we are very excited to present to you the bull offering this year. Obviously, the last few years the influence of WS Sugar C4 in our herd has led to some exciting herd sires being offered, but perhaps none as much as CLRWTR Clear Advantage. This bull has already done some great things in our herd, as well as Beshears, and we are honored to be able to offer a bull like this in his prime with a bright future ahead. Please contact us if you have any questions on this herd sire.

Bulls here at Clear Water are always backed by some of our best genetics, and the sire groups this year add a lot of value to these bulls. We never want to skimp on herd health here, if you have any questions on our practices or program please feel free to ask.

We are honored that you have taken the time to look through the offering. We invite you to come by and look at the bulls in person, but if you can not please contact us or DP Sales Management and we will be happy to assist you. Thank you for your interest!

Friends, welcome to the 2023 Clear Choice Bull Sale!

Jeff and Leah Meinders are some of the most welcoming people you will ever meet. I don't believe Jeff has ever met a stranger. This translates through their business, their cattle operation, and their hospitality as sale hosts. Come, eat, enjoy, and buy a bull!

The Clear Water program has been a mainstay in the Simmental industry for many years. Pedigrees reflect the importance of cow families and genetics, and many pedigrees found within these pages can be traced back to long-time CLRWTR genetics. The bulls here are backed by strong maternal pedigrees, while the paternal side adds genomics and data to reach new levels within your operation. Bobby, Joe, and Nate share in the same values as Simmental breeders, and their genetics always fit right into this sale.

We hope that you will visit Milan, Indiana to view the bull offering. It really is an impressive offering from start to finish. Should you have any questions about the bulls or the programs offering them please feel free to contact us and we would be happy to assist you. If you can not share in the hospitality of sale day, we invite you to utilize DVAuction to view the sale. Don't forget about the Clear Choice Customer Sale in April and the female sale in October. We appreciate your interest!

As a cattle breeder you dream and strive to raise cattle that can make a positive impact on herds. Clear Advantage has been one of those animals to our programs. We tried to purchase several sons of Sugar C4 and always seem to be runners up that day. Instead we purchased two flushes out of Sugar. The results have been nothing but awesome. As you know Sugar C4 sold in the Lazy C Diamond sale for \$210,000 to Lucas Farms in Missouri. She has produced many herd sires which are in top breeding programs and bull studs. On the flushing of C4 we choose Vantage Point because of the outstanding progeny on the ground. Even Jerry Lee purchased one season pasture rights on the bull and he bred and sold in the Denver sale! The first time Bobby Beshears saw Clear Advantage was at weaning, and purchased half interest that day. We both have outstanding calves on the ground and so do some top breeders. At our spring and fall sale we sold a limited amount of sexed and conventional semen. We had a limited amount of Canadian qualified and sold some in the New Year's Resolution sale. The young herd sire has breed leading EPDs with 11 in the top 10% or better; top 1% for TI, top 2% for CE, top 3% for WW, YW and MB, top 4% for Doc and API, top 5% MWW, and Top 10% for BW, ADG, MCE. He is homozygous polled and homozygous black. There are several Sugar sons on the market, but Bobby and I feel Clear Advantage is the most complete plus well balanced and attractive. Clear Advantage has some progeny via flushing and natural calves with nothing but positive reports. The decision was hard, but in true fashion to offer our best genetics to our customers we have decided to share in his success. You are purchasing full possession and 3/4 semen interest with a limited amount of semen. Seller Retains a total of 25% semen interest with option of complete buyout, give us a call for more details. Call Bobby or I for any additional details or questions on Clear Advantage.

WS Miss Sugar C4 - Dam of Lots 1 and 2

"Over the Top" is very fitting for this Ft. Knox out of the one of kind producer, Sugar C4. Sugar sold recently for \$210,000 going to Lucas Farms in Missouri. What did she do to demand that kind of money? Over the last several years her sons have sold at record prices and then went on to work in some of the most respected programs. Several of those sons are in bull studs and making a big impact. We have sold 2 sons, one to Iowa for \$24,000 to Schooley Cattle Co, and one of his sons was the second-high selling bull at his recent sale. The other, sold last year to Florida to James Skipper. "Over the Top" excels in performance and muscle. Just get behind him and view the thickness in his rear end and rump, down through his twist. K4B is loose made with loads of width and dimension. "Over the Top" is in the top 15% or better for CE, ADG, MM, MWW, Doc, MB, API and TI. API 160 which is top 10%. Take away the numbers and he is a great bull being stout, rugged, and wide based. Here is breeding bull that is homo polled and homo black.

Sons of HPF MISSY

Lots 3-5. Missy calves are always a customer favorite. We are really proud of these three brothers. KB50 and K87 are some of the first Point Proven calves to be marketed. Just look at the style, look, and extension these calves have. KD57's EPD profile reads just a little better than his half-brothers, but whichever bull you choose they will have a positive impact on your operation.

We added this Primo x Andie daughter to our operation a few years ago, and this is her first natural calf by Double Up. As you will be able to see from this sale catalog, we used Double Up heavily in our herd, and have been extremely pleased with his offspring. K365 is homozygous polled. We like the style and extra look Primo adds to the Andie family.

If you have been a follower of the Clear Choice Sales, Andie genetics will not be new to you. KA14, the Guardian son has the big-time numbers one would be accustomed to with CLRS genetics with a whopping 162 API. Though it isn't just the API, KA14 ranks in the top 1% for MWW, Top 2% for WW, Top 3% for TI, and Top 4% for YW. That doesn't include 5 other EPD traits that he ranks in the top 10-1%. If you are looking to add a big time pedigree with the genomics to back it up than KA14 should be on your short list.

When we purchased the flush on Onyx and mated her to SAM we knew the progeny would be exciting, but when you can put together a group of full brothers like this is pretty awesome. J51D is deep bodied, has great length of spine, and a nice hip. He combines both the phenotype and genotype to make a major impact on a Simmental operation. J51D is in the top 25% for CE and YG, and is hetero black and homo polled. Opportunities are great here.

The positives in this yearling bull are a long list for any visitor. Many breeders wanted to purchase him but we said come back the 4th Saturday in March. K457 is stout, long bodied, with shape, muscle combined with all the style and grace in movement. We have breeders in the fall and spring ask about the 457 progeny. We strongly believe in cow families and he is loaded with predictability. The family of Rage x Teardrop x Cowboy Cut x Oracle x Baby's Breath x Milestone x Basic Instinct and New Look is a fault free family. Homo polled and homo black.

Good as it Gets J45 is fall standout in his sire group and pen. Good as it Gets has many positive attributes to offer being deep bodied with internal dimension, shape, and length of body. J45 has a wide base to get around with ease and offers structural integrity. Good as it Gets has very predictable cows in the pedigree of Oracle, Milestone, Basic Instinct and 457. J45 will pass on maternal and udder quality. The product waits.

Working and visiting frequently with Clear Water, I have been fortunate to see some donors and calves upon my visits. It didn't take long for me to see the incredible future and impact Emberly was going to have at CLRWTR. We purchased embryos to support the Eastern Regional Fund, but we came away with so much more! The Emberly calves, both bulls and females have been well received at the sales finding their way to the top. This Pinnacle son is in the top 2% for YG, and top 4% for BF. KC48 is homozygous polled.

If you have kept up with Beshears genetics, you know that I used a lot of Deplorabull within our herd. Here are two full brothers out of Deplorabull and his dam Firefly W46 who began the reign of the Butterfly family most notable in the Hilbrands and Hudson Pines operations. Choose between the brothers just a month apart, but each possess the traits to be valuable herd bulls.

Opportunity is knocking here with KA34 having a bit of a different pedigree. While there aren't a lot of Dozer progeny out in the breed, we liked the bull and used him on a few of our donors. The Butterfly progeny did really well for Hudson Pines Farm both as open heifers in the show ring, and then the donor females who sold in the dispersal. KA34 is in the top 15% for ADG and BF as well as the top 20% for YW. Look forward to calves that put on the pounds.

We decided to take a completely different approach on a Butterfly flush and chose a bull with BIG numbers to combine with her femininity and elegance. With the impressive set of Guardian calves we have we should have done it would work out well. KD18 combines the best of both worlds from both sides of his pedigree - BIG numbers and great phenotype. Top 1% for WW, CW, and TI, top 2% for YW, top 4% for ADG, and top 5% for Marb and API.

We purchased a flush from Garrett Stanfield on this Cottontail daughter out of one of our customer sales, but knew of the long history this cow family has. We know now that utilizing Sam was an excellent choice and you can see that from these two brothers. J86B is strong in his top, tight in his sheath and well balanced. J86C is long bodied, rugged, with lots of mass and muscle. Both are homo polled and homo black.

KU19 took a striking picture for us, but lucky for you he carries this look in real life. Big, stout bull with lots of shape and muscle to pass on to his future progeny. Plus he has the white face and belly that commercial breeders are looking for. When you get past admiring him physically, take a look at his EPDs because being a son of Guardian he has numbers that will make an impact on the future.

We think that our set of bulls this year is one of the most consistent set that we have been able to produce to date. KD25 supports that with his overall package that he puts together being sound, level, square, and clean fronted. He has a touch of white on his face and belly.

I haven't studied the whole offering of bulls, but KG90 might just be the best numbered bull in the sale this year. A son of Guardian just check out the spread; top 1% for WW and YW, top 2% TI, top 3% MWW, top 4% REA, and top 5% ADG, CW. Plus several other traits in the top 25 percent. Exciting bull opportunity that I am looking forward to seeing what he can do in the future.

K29 is a baldy bull that will produce those baldy calves that will likely top the market and if you decide to keep replacements you will be happy as well. Exit 44 has balanced EPDs, and is in the top for MCE and Docility. This individual is out of a top-notch Cowboy Cut cow. You should like his top, length of body, and his neat design.

In the 2022 sale we sold 12 Vantage Point sons with all being well received and selling good with a top of \$6,600. Last year in two sales sexed and conventional semen was marketed and purchased by good breeders. Also, semen has been sold in Canada. This son is smooth made well balanced with a complete over design. K302 has very holes and will a benefit to any operation.

JS Southern Belle progeny has done an excellent job in our bull and female sales. This Rage son dam's Flat Out Flirty of JS producing high sellers and champions. Rage is producing higher than our expectations producing cattle with eye appeal and completeness. Rage K5C is homo polled and homo black. It is easy to recommend this Rage x Broker x Flirty bull. Also, he will add will add maternal; being in the top 10%.

There are females that you are really glad that you had the opportunity to add to your herd, and Alexis has been one of those females for us. She now resides at our friends the Sporleders here in Indiana. This pedigree is absent from most of the cow families you see over and over again today, making this a great outcross opportunity. Top 15% for YG and top 10% for BF.

AI'd on 6/10/22 to CLRWTR Clear Advantage (sexed semen)

If you make it through the catalog and miss seeing D029, you should probably see an eye doctor. This lady is a standout and its not just because of her unique color pattern. Look at that bone, belly, and level top that she is carrying. She has been bred to the Lot 1 bull Clear Advantage with sexed heifer semen for a very exciting calf.

Bred on 6/24/22 to H Excel 8051

If you are looking to add something different or looking for a bit of color, this Hereford female should fit the bill. No matter what color or breed she is, you can't fault her level top, big, square hip, and nice extension through her head/neck. Not to mention she has a very nice udder.
